Recent Developments in Transcatheter Aortic Valve Implantation

Message from the Guest Editor

Aortic stenosis (AS) is a common heart valve disease that can lead to heart failure and death. For patients with AS, valve repair or replacement surgery has historically been the mainstay of treatment, given that medical treatments have no proven benefit. However, transcatheter aortic valve implantation (TAVI) is increasingly becoming a preferred treatment option when compared to surgery, particularly for patients at an advanced age or those with comorbidities, as recovery from the treatment is typically much quicker. TAVI is a minimally invasive treatment, as biological valve implantation is performed percutaneously (on top of the diseased valve without its removal) via an intra-arterial sheath. This technology has evolved over the past 20 years to be equivalent in terms of safety and efficacy to aortic surgery with up to 10 years follow-up. This Special Issue aims to promote academic exchanges, progress the field of TAVI, and promote the widespread application of this technology in the treatment of heart valve diseases, including in more complex patient cases and scenarios.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
