Alzheimer's Disease and Related Disorders: Recent Advances in Prevention, Diagnosis and Therapy

Message from the Guest Editor

Neurodegenerative disorders leading to cognitive decline are rapidly rising in prevalence in most developed countries, largely because of the increasing median age of their populations. This rise poses potentially major adverse consequences with respect to neurologic and overall health, and caregiver burden. A major thrust of research in this area over the past three decades has been the development and refinement of fluid and neuroimaging biomarkers that can identify these disorders in their earliest stages and guide the implementation of therapies that will be the most effective at the point in time that irreversible neurologic damage is minimal or has not yet occurred. This Special Issue focuses on the latest developments in the biomedical field that promise to contribute to, or have already yielded, significant clinical benefits to people at risk for developing these disorders, or who are already suffering from their debilitating effects.

Guest Editor

Prof. Dr. Daniel H. S. Silverman

Ahmanson Translational Imaging Division, Department of Molecular and Medical Pharmacology, David Geffen School of Medicine at UCLA, University of California, Los Angeles, CA 90095-7370, USA

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
