

Special Issue

Clinical Imaging Guidelines and Treatment Strategies for Digestive System Diseases

Message from the Guest Editor

In recent years, an enormous progression in the diagnosis and treatment of gastrointestinal diseases has occurred due to the development of new instruments and technological methods, such as Fibroscan instead of liver biopsy for the evaluation of liver fibrosis in Hepatitis C, mechanical devices for the treatment of gastroesophageal reflux disease (GERD), using fecal microbiota for the treatment of *Clostridium difficile*, and so on. The aim of this issue is to provide a platform for clinical research and clinicians in the field of gastrointestinal diseases to publish their research findings and updated reviews on topics related to the diagnosis and treatment of gastrointestinal diseases. Papers on treatments for GERD and their impact, the diagnosis of liver diseases, small bowel US for IBD evaluation, the impact of GFD for CD, etc., are invited.

Keywords:

- celiac disease
- GERD
- liver
- IBD
- imaging
- GI

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
