Myocardial Infarction: Current Status and Future Challenges

Message from the Guest Editors

Cardiovascular disease remains the leading cause of morbidity and mortality worldwide, with coronary artery disease (CAD) being a major concern. In this regard, acute coronary syndrome (ACS), especially with myocardial infarction (MI), can be one of the most life-threatening manifestations of CAD. It is crucial to identify and manage risk factors to prevent the development of premature CAD and its associated complications. CAD is a complex disease with multiple risk factors, including genetics, lifestyle, and environmental factors. Myocardial infarction is a significant health concern that requires early diagnosis, effective management, and ongoing prevention. This Special Issue, entitled “Myocardial Infarction: Current Status and Future Challenges”, aims to provide a comprehensive platform to bring together contributions from international researchers in the area of myocardial infarction. As a result, we invite all researchers to submit their studies.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
