The Epidemiology and Effects of Cardiovascular Risk Factors in Athletes

Message from the Guest Editors

The number of people that exercise is continuously increasing worldwide thanks to preventive communication campaigns promoting a healthy lifestyle. Both in professional and recreational athletes, the cardiovascular risk profile and estimated protection of continuous exercise tend to be underestimated and undertreated, particularly in younger athletes. However, in last the few years, several studies on athletes have showed a concrete prevalence of hypertension, lipid disorders or less-studied alterations in metabolic parameters (i.e., hyperuricemia, thyroid function, overweight metabolic consequences). Moreover, less have investigated environmental and clinical factors that need to be evaluated to better understand the influence of these factors on heart adaptation to exercise and reducing the future development of cardiovascular diseases. The aim of this Special Issue is to highlight the influence of cardiovascular risk factors on athlete's health and their performance in exercise.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
