Special Issue

Retinal Diseases: Emerging Therapies and Vision Rehabilitation

Message from the Guest Editor

Retinal diseases are among the leading causes of visual impairment and blindness worldwide. Recent advances in biomedical research have led to the development of diverse novel therapeutic strategies. At the same time, efforts have been made to refine and optimize the application of existing treatments to address the limitations and challenges of newly developed therapies. Furthermore, for cases in which these interventions alone cannot restore sufficient visual function, vision rehabilitation—integrating advanced optical devices, digital technologies, and personalized training programs—has played a vital role in improving patients' functional vision and quality of life (QoL).

This Special Issue, "Retinal Diseases: Emerging Therapies and Vision Rehabilitation," aims to share knowledge that will enhance the understanding and application of best clinical practices, ultimately contributing to improvements in patient outcomes and quality of life. Looking ahead, it seeks to highlight the latest advances with the potential to expand the possibilities for retinal disease treatment, with the ultimate goal of making a meaningful contribution to the fight against vision loss.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
