Clinical Imaging Applications in Obstetrics and Gynecology

Message from the Guest Editors

The value of using non-invasive imaging methods such as ultrasound and other imaging tools is essential for diagnostics in obstetrics and gynecology. Modern imaging methods play an increasingly important role in daily diagnostics. New handheld devices are also increasingly being used in the field of gynecology and obstetrics, and so the training and further education of these new methods offers new approaches for patient diagnostics. However, evidence still has to be delivered concerning their value in daily clinical practice. The use of applications (apps) is also growing among patients and physicians to assist with medical care and patient interaction. For this Special Issue, submissions exploring “Imaging applications in Obstetrics and Gynecology” are invited.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief
