# Clinical Updates and Future Perspectives on the Management of Myocardial Infarction in Elderly Patients

### Message from the Guest Editor

Myocardial infarction (MI) in elderly patients is associated with an unfavorable prognosis, and it is becoming an increasingly prevalent condition. The prognosis of elderly patients is equally impaired in ST-segment elevation (STE) or non-STE (NSTEMI), with the latter being the most frequent clinical presentation in this population. In addition, the outcome is markedly worsened by the common presence of multivessel disease (MVD) and of a high bleeding risk (HBR). Elderly patients have been mostly excluded from randomized clinical trials and the evidence regarding their treatment is limited. In particular, there are three main gaps in knowledge:

- the strategy to pursue in NSTEMI patients: routine invasive vs conservative.
- whether, as for younger patients, a complete revascularization strategy in MI patients with MVD should be advocated.
- how to properly balance the concomitant ischemic and bleeding risk in this population with particular regard to dual antiplatelet therapy (DAPT) duration and intensity. Artificial intelligence could be particularly intriguing in the estimation of the two competing risks.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

---

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
