

Special Issue

Infections, Complications and Management of Kidney Transplantation

Message from the Guest Editors

Renal transplantation is the best treatment for end-stage renal disease patients and it is widely delivered in developed countries. However, there are a large number of complications that arise after transplantation hampering its short- and long-term outcomes. In the present Special Issue of the *Journal of Clinical Medicine*, we aim to collect a number of reviews and original articles that highlight significant advances in the management of renal transplants and its complications. As complications directly impact on the health and the outcome of transplant recipients, this Special Issue should increase the awareness as well as the knowledge of transplant physicians and researchers in these issues.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi
