New Insights into Acute Respiratory Distress Syndrome

Message from the Guest Editors

Acute respiratory distress syndrome (ARDS) is a severe, acute lung dysfunction arising from a number of conditions, including severe pneumonia, septicemia, trauma, and also coronavirus disease 2019 (COVID-19) infection. The aim of this Special Issue of the *Journal of Clinical Medicine* is to investigate the causes and management of ARDS. We would like to offer a platform for health professions to present the current understanding of ARDS, including the diagnosis, treatment, rehabilitation, and outcomes. Furthermore, research reporting the unfortunate mistakes made during the COVID-19 pandemic that exacerbated ARDS is welcome as well.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
