Special Issue

Intracerebral Hemorrhage: Clinical and Neuroimaging Characteristics

Message from the Guest Editor

Intracerebral hemorrhage (ICH) remains a major cause of morbidity and mortality worldwide. Several factors, such as hematoma volume and hematoma location have been reported to impact neurological outcome. In contrast to them, early hematoma growth is potentially modifiable if detected early enough and therefore presents an appealing therapeutic target. Hematoma Expansion can be predicted using clinical information and advanced neuroimaging techniques including machine learning approaches. This Special Issue will focus on the clinical and neuroimaging characteristics of intracerebral hemorrhage and their potential value for predicting neurological outcomes with the final aim of tailoring individual treatment approaches.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
