Intracerebral Hemorrhage: Clinical and Neuroimaging Characteristics

Message from the Guest Editor

Intracerebral hemorrhage (ICH) remains a major cause of morbidity and mortality worldwide. Several factors, such as hematoma volume and hematoma location have been reported to impact neurological outcome. In contrast to them, early hematoma growth is potentially modifiable if detected early enough and therefore presents an appealing therapeutic target. Hematoma Expansion can be predicted using clinical information and advanced neuroimaging techniques including machine learning approaches. This Special Issue will focus on the clinical and neuroimaging characteristics of intracerebral hemorrhage and their potential value for predicting neurological outcomes with the final aim of tailoring individual treatment approaches.

Guest Editor

Dr. Peter Sporns

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
