

## Special Issue

# Clinical Research Advances in Thoracic Surgery

### Message from the Guest Editor

There are several ongoing and recently completed clinical research advances in the field of thoracic surgery. These advancements aimed to improve surgical techniques, patient outcomes and the quality of life for thoracic surgery patients. This Special Issue will focus on the following three topics: Neoadjuvant therapies; Immunotherapies and targeted therapies; Biomarkers and personalized medicine. It is important to note that the field of medicine, including thoracic surgery, is continuously evolving. New advancements may have emerged since my last update, and I would appreciate your contributions to these topics.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
