Cardiac Ablation: Current Status and Future Perspectives

Message from the Guest Editors

Cardiac ablation is an electrophysiological procedure that involves using energy to create scar tissue within the heart to treat various cardiac arrhythmias. The current status of cardiac ablation reflects its widespread use as an effective treatment option for individuals with abnormal heart rhythms including both ventricular and supraventricular tachycardia. This minimally invasive procedure has demonstrated positive outcomes in restoring normal heart rhythm and improving patients' quality of life as well as in such cases to improve survival. A number of different technologies are used in cardiac ablation including 3D electroanatomic mapping systems, intracardiac echocardiography, steerable catheters, and cerebral protection devices. Moreover, different types of energy are employed, such as radiofrequency, cryoablation, pulsed fields, and laser. Future perspectives in cardiac ablation focus on refining existing techniques, exploring novel technologies, and improving patient outcomes..... More info: mdpi.com/si/194991,

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
