

## Special Issue

# Cognitive Impairment, Dementia and Depression in Older Adults

### Message from the Guest Editors

This Special Issue aims to investigate the approaches to the diagnosis, management, and treatment of cognitive impairment, dementia, and depression in older adults from a clinical perspective. We invite submissions that integrate clinical and neuropsychological evaluations, and artificial intelligence (AI)-based predictive modeling. Particular interest is given to interdisciplinary approaches bridging medicine and neuroscience, including the development of AI models for predicting depression and Parkinson's disease, and understanding their shared pathways with dementia. This Special Issue seeks high-quality clinical research that focuses on the interplay between neurodegeneration and mood disorders, machine learning applications in geriatric mental health, and systems-level models of brain aging. By combining data science and clinical insight, this Special Issue seeks to promote innovative strategies for early detection, personalized prediction, and intervention in aging-related cognitive and affective disorders.

### Guest Editors

Dr. Seong Jae Kim

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
