

Special Issue

The Clinical Perspective on Pregnancy Complications and Symptoms

Message from the Guest Editors

The majority of pregnancies indeed have positive outcomes for both mothers and babies. However, it is important to acknowledge that significant complications during pregnancy persist, and their occurrence rates have remained relatively stable. These complications, including preeclampsia, preterm birth, stillbirth, and intrauterine growth restriction (IUGR), affect more than 12% of pregnancies worldwide. It is crucial we recognize that these complications have detrimental effects on both maternal and neonatal health, with potential short- and long-term consequences. In recent years, numerous research groups have focused on exploring novel or existing methods to address these complications. This Special Issue welcomes the submission of papers that discuss current advances in prenatal diagnostics and explore knowledge gaps in the development of novel therapeutic strategies from a clinical perspective. Topics of interest include the care of pregnant women, alternative methods for relieving labor pain, methods of fertility regulation, and innovations in diagnostic tests and preventive programs in gynecology.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
