Challenges in Fertility Preservation

Message from the Guest Editors

Survival rates after cancer treatment have increased due to advances in oncology. However, oncological treatments such as surgery, chemotherapy, and radiotherapy can be gonadotoxic and can reduce fertility. Ovarian reserves can be damaged by oncological treatments, resulting in drastic reduction in fertility. For this reason, women diagnosed with cancer should be referred to IVF centers before starting gonadotropic therapies, since having children is an important factor in the quality of life overall.

The gold standard technique in fertility preservation is oocyte and/or embryo cryopreservation, depending on the age of the patient, the woman's desire, the presence of a partner, and the law of the country in question.....

The aim of this Special Issue of the Journal of Clinical Medicine is to report the latest research on oncofertility and fertility preservation techniques. We aim to attract original research articles and reviews on the latest updates in oncofertility and fertility preservation, with the larger aim of improving clinical outcomes and ensuring optimal short- and long-term management.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
