Challenges in Reproductive Health

Message from the Guest Editors

Reproductive health is influenced by a wide range of physiological, pathological, and treatment-related factors that may compromise fertility and long-term reproductive outcomes in both women and men. Advances in reproductive medicine have improved prevention, diagnosis, and management strategies; however, significant clinical challenges remain. Cancer and its treatments represent a major threat to reproductive function, making fertility preservation an essential component of patient care..... Beyond oncology, reproductive health challenges also encompass endocrine disorders, gynecological and andrological diseases, genetic conditions, aging, and lifestyle-related factors. The aim of this Special Issue is to highlight current challenges and recent advances in reproductive health, with particular attention to fertility preservation and reproductive medicine. We welcome original research articles and reviews addressing both female and male reproductive health, innovative clinical approaches, and strategies to improve short- and long-term reproductive outcomes.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi
