Heart Failure: Challenges and Future Options

Message from the Guest Editors

Heart failure remains one of the greatest challenges in cardiovascular medicine, representing a major cause of morbidity, mortality, and healthcare burden worldwide. Despite remarkable advances in pharmacological and device-based therapies, the prognosis of patients with heart failure continues to be poor, and the unmet clinical needs remain substantial. In recent years, new therapeutic strategies, innovative technologies, and refined diagnostic tools have significantly expanded our ability to treat and monitor patients with heart failure. From disease-modifying drugs to advanced devices, from biomarkers to imaging modalities, the field is evolving rapidly. We particularly welcome contributions focused on the following:

- Novel pharmacological and device-based therapies;
- Biomarkers and imaging in risk stratification and treatment guidance;
- Cardiorenal interactions and comorbidities;
- Advanced heart failure, transplantation, and mechanical circulatory support;
- Implementation of precision medicine and multidisciplinary approaches.

We look forward to your valuable contributions that will help to shape the future directions of heart failure research and clinical practice.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
