

Special Issue

State of the Art in Hand Surgery

Message from the Guest Editors

Hand surgery is fast-developing specialty connecting surgeons of different specialties and hand therapists. From the very beginning, there was a high demand for the scientific justification of the solutions and procedures used to treat our patients. On the other hand, through the determination of the pioneers and their followers, we can offer predictable treatment for most hand conditions despite the lack of hard evidence. The state of the art can be interpreted in different ways. I am happy to open and lead this Special Issue and to include both review papers summarizing actual knowledge and practice but also research manuscripts that investigate our present work or new ideas. It is a perfect combination of what we already know and do and also what we could do in a better way, including criticism, which is so important to further development. We invite you to contribute, as we all need good science in the background of our daily practice.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi
