State of the Art in Electrocardiography

Message from the Guest Editor

Nowadays, the interventional treatment of cardiac arrhythmias represents a continuous challenge. This is mainly due to the extension of indications for catheter ablation and cardiac device implantation. Despite the continuous improvement in diagnostic and therapeutic technologies, the electrocardiogram reemerges as an important tool in modern arrhythmology. The clinical indications provided by the electrocardiogram are arguably more crucial today than they were in the past, particularly in the early diagnosis of arrhythmic heart diseases, risk stratification, guidance for cardiac device implantation, and the planning and execution of catheter ablation. The aim of this Special Issue is to provide a comprehensive overview of the advances in electrocardiographic knowledge for the diagnosis and treatment of cardiac arrhythmias. Therefore, researchers in the field of clinical arrhythmology and electrophysiology are encouraged to submit original articles or reviews to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
