## Managements of Venous Thromboembolism

### Message from the Guest Editor

Venous thromboembolism (VTE) remains a major cause of morbidity and mortality worldwide. Recently, direct oral anticoagulants, individualized risk assessment tools, and advances in imaging techniques have reshaped the management landscape. Moreover, the application of AI and machine learning algorithms is emerging as a promising approach to enhance prediction, diagnosis, and clinical decision-making in VTE. Nevertheless, unresolved questions persist, including anticoagulation duration, recurrence/bleeding risk stratification, and care for special populations (e.g., elderly, pregnant patients). The Special Issue aims to provide an updated overview of current evidence and emerging research in the management of VTE, with a focus on advances in pharmacologic therapies, predictive models—including AI-driven tools—and personalized approaches. We welcome original research articles, clinical studies, reviews, and expert commentaries addressing clinical decision making, prevention strategies, and novel therapeutic interventions. Contributions from multidisciplinary perspectives are strongly encouraged to foster a comprehensive understanding of this complex and evolving field.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
