Hepatobiliary and Pancreatic Surgery: Diagnosis, Management and Future Opportunities

Message from the Guest Editor

The global adoption of minimally invasive techniques, such as laparoscopic and robot-assisted surgery, has been rapid in hepatobiliary and pancreatic surgery. However, there is still a lack of comprehensive studies comparing these methods to open surgery, particularly in terms of short- and long-term outcomes. While the benefits of laparoscopic surgery have been established through numerous studies, the efficacy of robot-assisted surgery remains uncertain. The rapid advancements in minimally invasive techniques have significantly impacted clinical practice, reducing hospital stays and complications. This Special Issue seeks to examine the future prospects of surgical procedures in hepatobiliary and pancreatic surgery in greater depth.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
