New Clinical Advances in Macular Degeneration

Message from the Guest Editors

Age-related macular degeneration (AMD) is a progressive macular disease that represents an increasing burden for both patients and healthcare systems worldwide. The clinical manifestations of AMD range from drusen to geographic atrophy and macular neovascularization. Until a few years ago, there was no proven treatment for dry AMD. However, early and intermediate AMD have recently been recognized as multifactorial entities that respond to various therapies, including complement factors and statins. In addition, several studies have supported the use of anti-complement therapies to reduce the progression of geographic atrophy. On the other hand, many new agents against the vascular endothelial growth factor have recently been approved for the treatment of neovascular AMD. Nevertheless, we still have limited knowledge of the indication criteria and outcomes of these new treatment agents following different treatment protocols. This Special Issue of the *Journal of Clinical Medicine* focuses on clinical advances in macular degeneration in terms of diagnostic methods, biomarkers, new therapeutic concepts, agents, and protocols.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
