Ischemic and Hemorrhagic Complications of Uncommon Cerebrovascular Diseases: Cutting-Edge Clinical Research, Reviews, and Expert Opinions

Message from the Guest Editors

We invite researchers, clinicians, and experts in the field of cerebrovascular disease to submit original articles for this Special Issue focused on ischemic and hemorrhagic complications of uncommon cerebrovascular diseases. This issue aims to shed light on rare and less-understood conditions that contribute to ischemic and hemorrhagic strokes, exploring their underlying causes, diagnostic challenges, novel treatment approaches, and outcomes. As uncommon cerebrovascular diseases often remain under- or misdiagnosed, they represent a critical gap in current cerebrovascular research and clinical practice. Furthermore, their varied presentations and complex pathophysiology present significant challenges for timely diagnosis, intervention, and effective management. By bringing together a wide range of perspectives, we hope to enhance awareness, improve diagnostic accuracy, and drive the development of better therapies. This Special Issue seeks to promote deeper clinical insights and foster collaboration, ultimately advancing our ability to address these often overlooked conditions in both research and patient care.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
