

## Special Issue

# Latest Advances in the Diagnosis and Management of Vitreo-Retinal Disorders

### Message from the Guest Editor

In recent years, the management of retinal and choroidal diseases has undergone major advances in diagnosis and treatment. In the area of diagnosis, the past two decades have seen significant advances in optical coherence tomography (OCT) as well as OCT angiography and color scanning laser ophthalmoscopy, which have become popular worldwide. Thus, multimodal imaging has improved the accuracy of diagnosis and understanding of pathological conditions. The increase in testing equipment also means an increase in the number of images of healthy and diseased eyes. Treatment for diseases has also evolved dramatically. Anti-VEGF drugs have become a mainstay in the treatment of retinal diseases such as age-related macular degeneration (AMD), diabetic retinopathy, and macular edema and have greatly expanded the potential of drug therapy for these diseases. This Special Issue invites a wide range of research related to ophthalmic diagnosis and management. Our aim is for this issue to be of help in the diagnosis and management of vitreo-retinal disorders and to assist in your future research.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
