Clinical Advances in Endodontic Dentistry

Message from the Guest Editors

This Special Issue, "Clinical Advances in Endodontic Dentistry", aims to bring together articles covering relevant scientific topics on endodontics and recent advances in the development and optimization of all branches of endodontics such as instrumentation; endodontic anatomy; root canal cleaning systems; biomaterials; the use of tools such as CLSM, Micro-CT, etc.; cytotoxicity; the endodontic microbiome; antimicrobials; and irrigants. Therefore, this Special Issue welcomes contributions from all researchers working in dentistry, biomolecular sciences, or material processing in relation to endodontics, regenerative endodontics, and dental restoration. This Special Issue will be a timely approach to survey the recent progress in the development and optimization of these subjects. We are pleased to invite you to share your studies in this Special Issue by proposing new clinical proposals or research based on these topics.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
