

Special Issue

Up-to-Date Research in Liver Transplantation

Message from the Guest Editor

In the present Special Issue, we aim to collect several review and original articles that highlight the significant advances in the indications and in the selection process for LT. Specific chapters will be dedicated to the new oncologic indications for LT, such as HCC with extended criteria, iCCA, PCCA, and liver metastases for CRC. The advances in pharmacological treatment of HCC based on immunotherapies and/or loco-regional therapies that permit obtaining the downgrading or downstaging of HCC within accepted criteria for LT will be part of this Special Issue. Particular attention will be reserved for the use of DCD donors and the potential support of stem cell transplantation. Finally, a careful evaluation and treatment of cardiometabolic complications in the long term after LT will be reviewed.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
