Recent Clinical Advances in Reconstructive Urology and Prosthetic Surgery

Message from the Guest Editors

We are pleased to present this Special Issue in the *Journal of Clinical Medicine*. Over the years, the field of reconstructive urology has undergone remarkable transformations, driven by a rich history of innovation and the ongoing pursuit of excellence in patient care. The goal of this Special Issue is to provide a platform to showcase the scope and significance of advancements in reconstructive urology and prosthetics. Through this, we aim to foster a deeper understanding of key challenges, inspire new solutions, and improve clinical outcomes for patients worldwide. We invite cutting-edge research that pushes the boundaries of surgical techniques, explores novel prosthetic designs, investigates biomaterials, and evaluates patient-centred outcomes. This includes studies on minimally invasive procedures, technological integration, and the long-term impact of innovative solutions. We welcome the submission of original research articles and comprehensive reviews. Whether your work contributes to clinical practice, surgical innovation, or patient quality of life, we encourage you to share your findings and help shape the future of this dynamic speciality.
