

Special Issue

Clinical Advances in Genetic Obesity and Health

Message from the Guest Editors

This Special Issue aims to explore the latest clinical and research advancements in the field of genetic obesity as well as any obesity-related comorbidity, such as diabetes mellitus, cardiovascular disease, and metabolic syndrome. Unraveling the genetic component of obesity onset and progression will shed light on developing tailor-made and more effective treatment strategies. The following Special Issue encourages the submission of original research articles and reviews that offer novel insights into i) the role of genetic variants in obesity diagnostics, ii) the role of genetic variants in the development of diagnostic tools for the early detection of genetic obesity, iii) the role of genetic variants in the evaluation of individuals' response to clinical interventions (both pharmaceutical and lifestyle interventions), iv) the effect of gene–lifestyle interactions and their clinical implications, and v) the connection between pre-clinical findings and clinical solutions through translational research. Welcome to contribute papers, please click [here](#) to find more details. Keywords

- obesity
- genetics
- health
- nutrigenetics
- clinical trials
- personalized

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
