Emerging Therapies: Clinical Trials and Insights in Psoriasis

Message from the Guest Editors

Psoriasis is a chronic, immune-mediated inflammatory skin condition with a broad clinical spectrum and substantial impact on quality of life. Although significant therapeutic advances have been made, challenges remain in terms of disease classification, diagnosis, and the management of associated comorbidities. This Special Issue aims to explore innovative diagnostic tools, novel biomarkers, and emerging therapeutic strategies, including biologics and small molecules. We invite original research articles that offer new insights into the clinical, molecular, and therapeutic landscape of psoriasis. It also seems interesting to gather insights into new aspects of the impact of psoriasis on the psychosocial functioning of patients, especially in view of the changing global context. Studies focusing on personalized treatment approaches, real-world evidence, and long-term management outcomes are especially welcome. We encourage contributions that will deepen our understanding of and ultimately improve care for patients with psoriasis. We look forward to your valuable contributions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
