Oral Health and Clinical Dentistry: Advances and Challenges

Message from the Guest Editor

The dental care field has changed radically in recent years, as has the rest of the healthcare world. Oral health has assumed key importance in relation to public health and correlations with systemic diseases. All of this has been accompanied by significant technological developments that have allowed for shorter timelines, reduced discomfort and improved quality of care, including minimally invasive care reserved for patients. Therefore, this Special Issue aims to gather news regarding dental techniques (in all areas), the care of systemic patients, and the importance of prevention and oral hygiene to ensure quality and outcome, whereby the outcome is understood as success in the dental treatments performed, which, especially in prosthetic rehabilitations, is ensured by periodic checkups and oral hygiene maintenance sessions. We look forward to receiving your submissions to this Special Issue.

Guest Editor

Dr. Elisabetta Maria Polizzi

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
