Clinical Advances of Adolescent Idiopathic Scoliosis: Current Status and Prospects

Message from the Guest Editors

Adolescent idiopathic scoliosis (AIS) is a significant clinical concern, this spinal deformity poses challenges due to not only its impact on quality of life but also the complexities in treatment and long-term care. The continued advancement of clinical practices and research efforts is important to improving outcomes for those affected by AIS. The Special Issue aims to collect the latest advancement in the diagnosis, treatment, and overall management of AIS. Recent years have seen a surge in innovative approaches, from enhanced bracing techniques and surgical advancements to the incorporation of digital health technologies, which are helping to refine treatment precision and patient monitoring. The issue will deepen key areas of clinical progress, including non-invasive therapies, surgical strategies, and the evolving role of rehabilitation in AIS care. Additionally, research advances exploring long-term outcomes, treatment optimization, and the integration of innovative approaches will be highlighted to offer a comprehensive view of the current landscape and future directions. We invite contributions from experts in AIS research and clinical practice to share their findings.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
