Clinical Challenges in Heart Failure Management: 2nd Edition

Message from the Guest Editors

Heart failure (HF) is a pandemic of the third millennium, accounting for high rates of mortality and hospitalizations. The HF burden has exposed cardiologists and hospitals to an increasing number of patients requiring treatment. For this reason, an improved approach to HF is required. The introduction of new treatment strategies, such as guanylate cyclase stimulators and myosin activators, is opening up new possibilities for HF patients to avoid adverse events. Moreover, the results of recent SGLT2i trials have opened up new treatment possibilities for HF patients with preserved ejection fraction. Besides pharmacological treatment, interesting results have been observed regarding the non-pharmacological treatment for HF, such as cardiac contractility modulation (CCM) in patients with refractory symptoms, which reduces the number of HF and CV deaths. In conclusion, a tailored approach to HF patients is needed in order to improve the quality of life of patients. The Special Issue will focus on diagnostic, prognostic, and therapeutic innovations with the aim of sharing clinical experiences to improve HF patients' management.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
