Special Issue

Latest Advances in Endoscopic Imaging and Therapy—Part II

Message from the Guest Editor

Recently, research on image-enhanced endoscopy (IEE) has reported benefits regarding the accuracy and reproducibility of endoscopic diagnosis for gastrointestinal (GI) tumors and premalignant lesions. The latest advances in imaging modalities in GI endoscopy have mainly been associated with the development of artificial intelligence (AI), and computer-aided diagnosis (CAD) is garnering increased investigation.

In the coming years, next-generation endoscopy is anticipated to integrate robotic-assisted devices, AI technology, preventive medicine, and informative genomic medicines. Unraveling carcinogenesis with endoscopic sampling will provide new insights and open the door for translational research in this Special Issue, which is a continuation of an incredibly successful Special Issue.

This Special Issue, Part II, aims to disseminate knowledge on how endoscopic imaging is being developed to provide readers with a view of the future of diagnostic luminal endoscopy and to present the latest advancements in endoluminal therapeutic techniques. Endoscopic innovations are of particular interest.

Guest Editor

Prof. Dr. Hajime Isomoto

Division of Gastroenterology and Nephrology, Department of Multidisciplinary Internal Medicine, Faculty of Medicine, Tottori University, Yonago, Japan

Deadline for manuscript submissions

closed (10 September 2023)

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès
Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi
Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
