

Special Issue

Current Clinical Advances in Urinary Incontinence

Message from the Guest Editors

The management of UI has evolved considerably, offering a broad spectrum of treatment options ranging from conservative and minimally invasive therapies to advanced surgical techniques. First-line conservative treatments play a crucial role in the management of symptoms, especially in its early stages. Additionally, new technologies such as MS and non-surgical energy-based devices are emerging as promising, non-invasive alternatives for patients unfit for surgery or unwilling to undergo it. Our aim in launching this Special Issue is to gather high-quality contributions focusing on the latest and most innovative advances in the physiopathology, diagnosis, conservative and surgical management, and prevention of UI. We invite the submission of research articles and comprehensive reviews exploring the following topics:

- Emerging diagnostic technologies for a more precise evaluation of UI;
- Advances in conservative therapies, including PFMT, pharmacotherapy, and non-invasive devices;
- Surgical innovations and minimally invasive procedures for UI management;
- The impact of UI on quality of life and strategies for patient-centered care.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
