Clinical Management of Hearing Loss

Message from the Guest Editor

Hearing loss (HL) is one of the most common disorders in modern society. HL can be divided into conduct HL, sensorineural HL and mixed one. The etiology of HL is broad, including both genetic and acquired HL. Conduct HL, caused by issues in the external ear canal and middle ear, can be treated through surgery to help patients hear normal and/or hear better. Sensorineural HL can be original from hair cell damage, synapse impairment, impairment of auditory nerve, different parts of central auditory system. Management of HL have been developed based on recently advanced knowledge on research of HL. In this Special Issue, we would like to invite authors worldwide to submit your recent finding on the management of HL focus on pharmacology, operative practice, habilitation/rehabilitation of HL from external ear canal to central auditory system. Authors are also welcome to more advanced research, such as gene/stem cell therapy in the field.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
