

Special Issue

State of the Art: Joint Disease and Sport Medicine

Message from the Guest Editor

Recent developments in joint disease treatment and sport medicine have aimed to improve outcomes and reduce complications. Our Special Issue focuses on some of the most interesting trends and developments in this significant and fast-moving field. We are especially interested in recent advancements in joint disease treatment, such as artificial joint replacement; joint arthroplasty; biological materials etc. Additionally, sports medicine deals with the diagnosis, management and treatment of injuries related to exercise or recreational activity. We also focus on the role of sports medicine in joint treatment, and how they go hand-in-hand. The aim of this Special Issue is therefore to effectively combine and coordinate research and results in order to understand and improve joint treatment and sport medicine.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
