

## Special Issue

# Advances in Musculoskeletal Rehabilitation and Functional Movement

### Message from the Guest Editor

The current Special Issue focuses on contemporary advances in exercise training, musculoskeletal rehabilitation, and functional movement science. Key areas include biomechanical mechanisms underlying human movement, evidence-based approaches to corrective and functional training, and the application of electromyography to explore muscle activation strategies during exercise. We welcome studies that elucidate the interaction between neuromuscular function and movement quality, propose innovative strategies to address movement impairment, or demonstrate the clinical and performance benefits of targeted rehabilitation interventions. Research integrating biomechanical assessment, functional training methods, and patient-centered rehabilitation outcomes will be central to this Topic. We look forward to receiving contributions that deepen our understanding of musculoskeletal function and support the development of effective training and rehabilitation practices.

### Guest Editor

Dr. Sanghee Park

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
