

## Special Issue

# Advances in Perioperative Care: Challenges and Perspectives in Enhanced Recovery after Surgery, Perioperative Optimization and Prehabilitation

### Message from the Guest Editors

The field of perioperative care has undergone a real revolution over the last 25 years. The rapid spread of enhanced perioperative recovery pathways at first, and later of prehabilitation, has revolutionized the rules of management of patients scheduled for surgery. Despite this, the implementation of such strategies in many centers is suboptimal, and there are still many issues on which evidence is lacking. The aim of this Special Issue is to serve as a forum to critically address the most relevant and, above all, some of the most unexplored aspects of perioperative medicine, from education, strategies for implementation, maintenance, possible areas for future improvement, and, most importantly, the long-term outcomes and patient-reported outcome measures. Priority is given to high-quality, original studies, but well-designed and conducted systematic reviews (with or without a meta-analysis) are welcome. In summary, the Special Issue aims to increase clinicians' knowledge of poorly explored areas of perioperative care, as well as to provide a balanced, sound, and evidence-based overview of the advances and potential perspectives in the field.

### Guest Editors

Dr. Carlos Cerdán Santacruz

1. Colorectal Surgery Unit, General Surgery Department, Hospital Universitario de la Princesa, Madrid, Spain 2. Colorectal Surgery Department, Clínica Santa Elena, 28003 Madrid, Spain

Dr. Gianluca Pellino

1. Department of Advanced Medical and Surgical Sciences, Università degli Studi della Campania "Luigi Vanvitelli", Naples, Italy 2. Colorectal Surgery, Vall d'Hebron University Hospital, Barcelona, Spain

### Deadline for manuscript submissions

closed (25 February 2025)

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

---

### Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
