Advances in the Colorectal Cancer

Message from the Guest Editor

The use of immunotherapy regimens for mismatch repair-deficient colorectal cancer and use of targeted therapy, like the combination of trastuzumab and tucatinb for HER2-positive colorectal cancer, has definitely made an impact on outcomes for patients with metastatic colorectal cancer. The use of genomic testing upfront to guide treatment decisions has been key in improving progression-free survival and overall survival for patients with colorectal cancer. In patients with colorectal cancer that have liver-only metastases, the varied liver-directed treatment options, like transarterial chemoembolization, transarterial radioembolization, radiofrequency ablation, liver transplant and use of hepatic artery infusion pump therapy, have accelerated the progress in the metastatic colorectal arena. In this Special Issue, you are invited as an expert in the field to share your insight and submit a manuscript on the novel research and treatment strategies that have advanced the survival of patients with colorectal cancer.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
