Clinical Diagnosis and Management of Chronic Venous Diseases

Message from the Guest Editor

Chronic venous insufficiency (CVI) is a prevalent vascular disorder resulting from impaired venous return, leading to symptoms such as varicose veins, edema, skin changes, and venous ulcers. Although advances in diagnostic imaging and treatment have improved patient care, the underlying pathophysiology is complex and not fully elucidated. Recent research has highlighted the roles of venous valve incompetence, venous hypertension, inflammation, and microcirculatory dysfunction. Despite these advances, standardized diagnostic and therapeutic protocols remain limited, underscoring the need for further investigation. We welcome original research, reviews, and clinical trials covering all aspects of CVI. Contributions exploring disease pathophysiology, risk factors, and prevention are also encouraged. We invite researchers and clinicians from vascular medicine, surgery, dermatology, radiology, and related disciplines to contribute. By bringing together innovative research and clinical insights, this Special Issue aims to advance understanding and improve care for patients with chronic venous insufficiency.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
