Advances in Diagnosis and Treatment of Amyloidosis

Message from the Guest Editor

In recent years, advances in the diagnosis and treatment of amyloidosis have been abundant and encouraging. The utilization of appropriate techniques to confirm the diagnosis and subtype of amyloid deposition is now increasingly critical as there are effective treatments for both light chain (AL) and transthyretin (TTR) amyloidosis that need to be selected thoughtfully. This Special Issue will highlight **advances that help shape the approach clinicians take to make an accurate diagnosis of amyloidosis and select the optimal upfront treatment strategy.** We also describe **advances made for patients with relapsed disease and highlight future modalities under investigation.** Finally, **the diagnosis and management of specific organ disease including cardiomyopathy, nephropathy, and peripheral/autonomic neuropathy due to amyloidosis** will also be discussed.

Guest Editor

Dr. Michael Rosenzweig

Department of Hematology & Hematopoietic Transplantation, City of Hope Comprehensive Cancer Center, Duarte, CA, USA

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
