Clinical Rehabilitation Update on Alzheimer's Disease and Dementia

Message from the Guest Editors

Research shows that dementia and Alzheimer's are leading causes of the need for residential care in older adults. Medical evidence shows that both pharmacological and integrated non-pharmacological treatment, such as physical and cognitive rehabilitation, can improve the symptomatology of these patients, with a favorable impact on their quality of life. We invite researchers to contribute original research articles (priority will be given to experimental studies) as well as review articles that stimulate continued efforts to better understand the relationship between rehabilitation and Alzheimer's disease and dementia. Potential issues may include, but are not limited to:

- The effects of exercise on Alzheimer's disease and dementia;
- The effects of physical and cognitive rehabilitation on Alzheimer's disease and dementia;
- New non-pharmacological therapies in the management of symptoms of Alzheimer's disease and dementia;
- Multidisciplinary approaches to Alzheimer's disease and dementia.

Welcome to your contribution, please click [here](#) to find more details

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
