Foot and Ankle Surgery: Current Advances and Prospects

Message from the Guest Editor

Foot and ankle surgery is a cornerstone of modern orthopedic and podiatric practice, addressing a wide spectrum of conditions ranging from trauma to chronic diseases. The complex anatomy and biomechanics of the foot and ankle, coupled with their critical role in mobility and weight bearing, make this field both challenging and essential. Over recent decades, there has been a remarkable evolution in our understanding of foot pathologies, ankle diseases, and their underlying clinical anatomy, driving significant advancements in treatment strategies. This Special Issue, "Foot and Ankle Surgery: Current Advances and Prospects," seeks to highlight the latest research and innovations shaping the field. It emphasizes not only the surgical management of trauma and deformities but also emerging non-invasive approaches, such as foot orthoses and advanced imaging techniques like weight-bearing CT. Special attention is given to multidisciplinary efforts targeting complex issues such as diabetic foot, where surgical precision, preventive strategies, and public health initiatives converge to improve patient outcomes.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
