# Diagnosis and Treatment of Aortic Diseases

### Message from the Guest Editor

The aorta has a variety of unique characteristics compared to other arteries. Due to its large caliber, the aorta is subject to high hemodynamic stresses and rotational flows influenced by the aortic valve, aortic curvatures in all three planes of space, and the departure of multiple arterial branches. These constraints influence the development of pathologies that play a significant role in overall mortality: atherosclerosis of the aorta, which is responsible for a substantial portion of strokes and systemic embolisms, dissection, and hematoma of the aortic wall. The aortic wall is thus subject to intense remodeling, which is the starting point of these diseases, with the development of plaques, wall inflammation, or matrix alterations leading to zones of fragility. Imaging the aorta remains complex due to the difficulty of thoracic exploration, the thinness of the aorta wall, and the constant movements requiring tracking devices. The therapy is no simpler, as the complex surgery involves cardiac, thoracic[...] For further reading, please follow the link to the Special Issue Website at: [https://www.mdpi.com/journal/jcm/special\\_issues/LRK232D7IT](https://www.mdpi.com/journal/jcm/special_issues/LRK232D7IT)

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

---

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
