

## Special Issue

# Latest Advances in Prosthodontics: Improving Patient-Centered Outcomes

### Message from the Guest Editor

Both patients and clinicians expect that prosthodontic treatments have a positive impact on oral health and wellbeing. However, since prostheses are directed towards influencing patient's oral function and aesthetics, the patient's perception may be the key parameter in assessing treatment outcomes because those relevant dimensions (oral function and aesthetics) can only be subjectively estimated by the patient. Over the past two decades, the importance of measuring patient-centered outcomes has been increasingly reported in the literature as a complementary but recommended tool for assessing prosthetic treatments. The outcomes of said procedures are variable and cannot be assessed reliably using clinical measures alone. For example, the improvement of masticatory function after replacing missing teeth may be assessed simultaneously by subjective and objective methods to effectively quantify changes in mastication. The focus of this Special Issue is to review what is currently known about the effect of prosthetic treatments on patient functioning and wellbeing by measuring patient-centered outcomes.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
