

## Special Issue

# Latest Advances in Degenerative Spinal Disease

### Message from the Guest Editor

As a spine surgeon performing surgery in all spine—my particular interest in the field of surgery is to reduce the invasiveness of spinal surgery and improve its safety. We believe that elucidating the mechanisms of spinal degeneration and spinal deformity can prevent the onset and progression of these diseases. My research comprises 20 years of studying tissue degeneration caused by oxidative stress; We have shown that excessive oxidative stress in tissue causes age-related degenerative diseases in mice. Building on these findings, we intend to explore clinically problematic neuropathies and spinal deformities through surgical and preventive developments in research. Fortunately, I had the opportunity to participate in a special project on spinal degenerative diseases. We would like to ask you to report your original research or review the latest findings. We ask for your cooperation so that we can incorporate a special feature with substantial content. *For more information, please click [here](#).*

## About the Journal

### Message from the Editorial Board

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
