

Special Issue

State of the Art: Clinical Use of Durable Left Ventricular Assist Devices

Message from the Guest Editors

The current issue will underline in detail the current data behind the use of all devices currently available for mechanical circulatory support (MCS) in the adult with special focus on clinical use, guidelines and evidence based data. It is a compendium of all the clinical scenarios that heart failure specialists, critical care physicians and cardiac surgeons can encounter in the patient with end stage heart failure. It will include the very important topic of patient selection. In addition, it will define those devices that are used as a bridge to recovery, durable destination devices or heart transplantation. Furthermore, as it is a field in constant evolution, it will also point out the areas where data is lacking and therefore further clinical research is needed.

- End stage heart failure
- Ventricular assist devices
- Recovery
- Adult congenital heart disease

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
