Circulating Biomarkers as a Liquid Biopsy for Cancer

Message from the Guest Editor

In recent years, researchers have been searching for an innovative paradigm with which to find people with cancer and get the right treatment. The potential solution they have been searching for is called a liquid biopsy or biofluid biopsy, and it is already within reach. Typical biofluids of this solution are blood and urine for the study of cancer. The core research goal of liquid biopsy is to find clinically useful biomarkers in biofluids and to detect low concentrations of biomarkers. This Special Issue of *Journal Clinical Medicine* tries to collect recent studies in liquid biopsy ranging from finding biomarkers to the molecular diagnosis of cancer, and thus brings together the most up-to-date technologies and advances in this expanding and evolving field. Our scope in this Issue includes exosomes; circulating nucleic acids; circulating tumor cells; and their emerging technologies for isolation, detection, and various applications.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
